Drive Digital Transformation

A flagship initiative of eCampusOntario, Digital Campus Canada bridges education and employment at scale.

Now more than ever, Canada's higher education institutions are embracing digital transformation, changing the way Canadians learn, upskill, connect with employers, and advance their careers.

Digital Campus Canada helps to build bridges between **education** and **employment** by:

- Supporting **learners** to find the programs they need for the careers they want;
- Enabling **institutions** to embrace the future of teaching and learning with virtual, hybrid, & experiential learning that empowers people with options;
- Connecting campuses to **employers** for collaborative innovation.

We help Continuing Education units **save money** through the power of scale and **increase revenue** through our platforms, programs, and services.
